

Queens College
Biology Department Colloquium Schedule
Fall 2014 — Wednesdays at 11:10am, SB D-139

	<u>Host</u>
Sept. 3 Organizational meeting for students	
Sept. 10 Domagoj Vucic , Genentech Posttranslational regulation of cell death and inflammatory signaling	Zakeri
Sept. 17 Prashnath Rangan , University at Albany, SUNY Maintaining immortality: lessons from the germ line	Savage-Dunn
Oct. 1 Jose A. Sanchez-Zapata , Universidad Miguel Hernandez Vultures and other macro-scavengers as providers of key ecosystem services	Anadon
Oct. 8 Davida Smyth , New York City College of Technology, CUNY Insights into the adaptability of the <i>Staphylococci</i> **FIRST REPORT DUE**	Dennehy
Oct. 15 Larissa Swedell , Queens College, CUNY Sexual conflict in a multi-level primate society	Lahti
Oct. 22 Mara Schvarzstein , Brooklyn College, CUNY Mechanisms preventing aneuploidy during <i>C. elegans</i> meiosis	Melendez
Oct. 29 Ryland Young , Texas A&M University Phage lysis: do we have the hole story now?	Dennehy
Nov. 5 Arthur Middleton , Yale School of Forestry and Environmental Studies Ecology and conservation of animal migration in the Greater Yellowstone Ecosystem **SECOND REPORT DUE**	Waldman
Nov. 12 Chenleng Cai , Mount Sinai School of Medicine A voyage to understand mammalian heart development	Holtzman
Nov. 19 Rebecca Spokony , Baruch College, CUNY The juvenile hormone pathway in <i>Drosophila melanogaster</i>	Weinstein
Dec. 3 Tijana Copf , New York University Genetic architecture of dendrite morphogenesis in <i>Drosophila</i> to understand human brain disorders - role for protein Kinase A (PKA) in developmental shaping of complex dendritic arbors in vivo **THIRD REPORT DUE**	Ma
Dec. 10 Mike Hickerson , City College, CUNY Comparative population genomics for community-scale inference	Boissinot
