

Stochastic Dynamics in Living Cells

Tuesday, May 26 at 9:00AM - 5:30PM
Science Center Room 4102
The Graduate Center @ 365 Fifth Avenue

This symposium brings together interdisciplinary researchers with a shared interest in studying the origins and consequences of stochastic molecular fluctuations in single cells. Invited speakers include Edo Kussell (NYU), Thomas Gregor (Princeton), Gabor Balazsi (Stony Brook), Mark Siegal (NYU), Kathryn Miller-Jensen (Yale), Thierry Emonet (Yale), and Sanjay Tyagi (PHRI). Registration details can be accessed at singlecellsymposium.wordpress.com. Email john.dennehy@qc.cuny.edu for info.
